

Natural Ingredients Gentle on the Skin Water Soluble Significantly Lower discomfort

SIMPLY THE MOST ECO-FRIENDLY HAIR REMOVAL SYSTEM EVER!

THE HISTORY OF SUGARING

The earliest reference to hair removal comes from ancient Egypt with hieroglyphics vividly describing how slave girls serving Pharaoh were expected to remove all body hair. Sugaring, one of the oldest forms of hair removal, was the Egyptian method of choice where a simple solution of sugar, lemon and water was blended to make a sugaring paste.

Now available in Australia, Phâro Salon Sugaring Formulations offer salons a professional, eco-friendly hair removal system and a natural alternative to waxing. The Phâro logo features the hieroglyphic image of water to emphasize the water soluble, natural base that makes this product infinitely superior to waxing products.

Why use the Phâro Sugaring wax

- ❖ **Natural.** Natural, Eco friendly formulation, free from solvents and harsh additives
- ❖ **Sensual.** With its luxurious gold colour and mica flakes and a delightful manuka honey fragrance Pharo takes hair removal to a near spa experience.
- ❖ **Economical.** Water soluble formulation makes cleaning simple, eliminating the necessity for expensive post-waxing solvents. Coverage of at least twice that of wax means cost savings to the salon especially with our Firm gel.
- ❖ **Low Discomfort.** Much lower application temperature than waxes. Gel adheres strongly to hair NOT skin, all of which results in significantly less discomfort
- ❖ **Water soluble** you will never ruin your equipment, bed, floors and clients or therapists clothes
- ❖ **Great on sensitive skin.** The natural formulation is free from rosins and washes off in warm water. No harsh chemical cleanup.

❖ **Compatible with tanning systems.** Waxes adhere to the skin and can peel off that fine layer of tanned skin. Also the chemical cleansers used with waxing can ruin the tan. Pharo sugaring is all natural, adheres to the hair not the skin and washes off in warm water.

The Benefits

- ❖ **Sugaring will not burn the skin**
- ❖ **Sugaring does not adhere to the skin**
- ❖ **Sugaring reduces broken and ingrown hairs**
- ❖ **Sugaring is more sanitary**
